

Gresham Power Electronics Adds Defence-industry Expert to Lead Business Development

Names Paul Waugh as Director of Business Development, Defence Sector

SALISBURY, U.K. – May 26, 2022– Gresham Power Electronics Ltd. (“Gresham Power”), a subsidiary of Gresham Worldwide Inc., today announced **Paul Waugh** has joined the company as **Director of Business Development**, effective May 17th, 2022.

Paul comes to Gresham Power having held global responsibilities for TE Connectivity, SAFRAN S.A. and QinetiQ Ltd. Bringing with him over twenty years’ experience in power systems, services and components, Paul will focus on building sustainable business growth and delivering customer requirement-based solutions in the Aerospace, Defence industry.

Paul’s timely arrival comes on the heels of recent strong bookings performance by Gresham Power related to successful opportunities for both tactical vehicle power systems and marine power supply/UPS systems. Paul’s expertise in the defence industry and his strategic ability to work with Tier I and Tier II prime contractors is expected to add to Company momentum through expansion into new technology sectors.

“Paul is a perfect addition to the Gresham Power Electronics’ team and we’re quite excited to have him join,” commented Karen Jay, Managing Director of Gresham Power Electronics, Ltd. “His global aerospace industry experience and familiarity with electrical and electromechanical product solutions will be a huge benefit to our customers. We expect Paul will help drive growth into new areas which we’ve targeted, including power systems for unmanned platforms and electronic countermeasures.”

As a subsidiary of Gresham Worldwide, Gresham Power Electronics has access to a full range of defence-related technologies and integrated solutions including power electronics, RF solutions, missile defence systems, Automated Test Equipment, electronic threat emulation and ruggedized power supply and display products. “Having a full suite of electronics technologies positions Gresham Power better to deliver bespoke solutions to satisfy the needs of defence customers worldwide,” Paul Waugh noted. “We are able to draw on the breadth of Gresham’s technology portfolio to make Gresham Power the go-to resource for mission-driven defence electronics applications.”
